How the Course Works and Learning Objectives

By completing *Armitage's Herbaceous Perennials for the Sun*, including the interactive exercises within each lesson and the end-of-lesson quizzes, you will gain a broader understanding of the various species and the best cultivars of old-fashioned plants. This online course, combined with the required textbook, also authored by Dr. Allan Armitage, will give you a more in-depth exposure to 20 perennials. The online lessons are delivered in both audio clips and text format. Enjoy listening to Dr. Armitage speaking about the different topics related to that lesson's plant.

The Learning Objectives

After completing the online lesson, you will be able to:

- Identify various species of that lesson's plant
- State propagation methods
- Identify growing conditions and cultivars
- Recall plant uses, history and little-known facts

Herbaceous Perennials for the Sun offers:

- Self-paced, self-study, online certificate course; accessible anywhere with an Internet connection
- Interactive exercises and end-of lesson quizzes to enhance your learning experience
- Audio clip tutorials from Dr. Armitage along with text equivalent scripts topics about each plant's:
 - Introduction and history
 - Diversity of plant
 - Propagation
 - Flower structure
 - Identification
 - Pros and cons

23 lessons in all; 20 genera!

- | | |
|----------------------------------|------------------|
| 1. Introduction | 12. Dianthus |
