How Does Introductory Governmental Accounting — Part II Work?

*Introductory Governmental Accounting — Part II* is a self-study training course offering the basics of accounting in a governmental environment. Delivered via the Internet, the course allows you to progress at your own pace, augmented by consultation with an accounting professional, upon request. The courses (*Part I, Part II, and Intermediate*) must be taken in sequence.

This course expands on the concepts you learned in *Part I*. You will learn the basics fund financial statements and expand your knowledge of Generally Accepted Accounting Principles (GAAP) for state and local governments. Topics include accounting for interfund activities, encumbrances, revenue, receipts, and disbursements. After successfully completing Part II, you are eligible to enroll in *Intermediate Governmental Accounting*.

Course Requirements

To complete this course, you will read the lessons, answer the Lesson quizzes, and complete the exercise at the conclusion of each lesson. You must score at least 70% on each of the lesson exercises, and complete the course’s case study, before you will be permitted to attempt the final examination.

About the Final Examination

The final is a timed exam. You have up to 75 minutes to complete the online exam for *Part II*. You must complete the exam in one session. Therefore, you must allow for adequate uninterrupted time. The online final examination consists of 50 objective, randomly generated questions. Each question in the final exam will be presented to you one at a time. You must answer each question before going on to the next question. You will not have the opportunity to revisit any question once you have answered and saved your answer to each question. You must earn 70% or greater on the exam to successfully complete this course. If you do not earn a 70% or greater on the final exam in your first attempt, one retest is available online. The retest is randomly selected and will not duplicate the same questions as the original exam (first attempt). Once the examination has been submitted for grading, you will learn your results immediately. In addition, you will be able to see the answers to each question and know which questions you missed as well as the correct answer. If you do not successfully pass the second attempt, you must re-register for the online course.
