- Merck & Company, Inc.
- Nationwide Insurance
- The Nielsen Company
- Quirk's Media
- Schlesinger Group
- Samsung Electronics Co.
- Sawtooth Software
- YPulse
- B3 Intelligence

What Graduates Say

I found the updated Principles course to be what I needed and at the exact right time. Sure, I wish I had taken the course years ago, but there is no better time than now to learn more. From what I've seen in the industry, I would recommend everyone starting out in market research to participate in this course. I also recommend that anyone who has gaps in MR knowledge to sign up. The course content is relevant, easy to process and implement, immediately into your conversations with internal teams or clients.

–Timothy Kunkel, Experienced supplied-side researcher USA

The Principles of Market Research provided me with important additions to my market research tool box. It goes deep enough to develop a sound theoretical basis for day-to-day decisions, while still being relevant for the practical user. Being an online course assures excellent flexibility to fit into a busy working calendar.

– Georg Neuschütz, General Motors Europe AG, Switzerland

Even though I have been involved in market research for quite some time, I learned a great deal. Everything is presented in manageable portions. The self-quizzes and practice exams are brilliant motivators. The “human” support from my faculty mentor has been first-class. I will be sorry to leave Principles of Market Research behind. I have enjoyed it immensely.

– *Jim Bruce, Customers for Life, Limited, Ireland*

After 30 years away from university learning, this was a challenging but a manageable “welcome back.” The Principles of Market Research course helped me broaden my focus by going back to principles that may fade from daily consciousness when working in a specialized research field.

– *David Gibson, InterMedia Survey Institute, Washington, DC, USA*

I never had a formal education in the field of market research. Principles of Market Research gave me a good basic grasp of market research concepts and the ability to more fluently speak the market research language.

– *Nancy Forbes, Market Intelligence Program Manager, International IT Company, USA*

All you need to know about MR combined in one place.

– *Alenka Bučan, Slovenia*

This course should be a prerequisite for all individuals, especially those working in research and client servicing roles.

– *Ross Wahid, Senior Manager DNA Marketing Research, Saudi Arabia*

The material was very relevant to the changing market research industry.

– *Aimee Kerstetter, TNS North America, USA*

I earn more money and my tasks have become more interesting and challenging by far. I am now considered a real market researcher.

– *Marcus Schleiffelder, PSYMA International Medical Marketing Research GmbH, Germany*

What Corporations Say

The Principles of Market Research has been beneficial to many of our employees for the last 17 years. It provides a great foundation for aspiring “researchers” or anyone remotely involved in the Market Research industry. We highly recommend this program.

– *Lisa Weaner, SVP, Retired, MaritzCX*

The flexibility of the program works well for our employees and for management. It’s a great tool that you should consider for your organization.

– *Mary P. Klupp, Director, Global Consumer Insights, Retired, Ford Motor Company*

The *Principles of Market Research* is a development program is a highly effective tool both for those at the start of their career journey or making a career switch to MR, and for those who are in a sales or marketing role but want to improve their insight/data-driven decision-making capabilities.

– *Elys Roberts, CEO, Ipsos Marketing Practices*

The *Principles of Market Research* is one of the most accessible and respected educational programs in the industry. We will continue to encourage our employees to participate because it makes them better researchers for themselves, 20|20 and our clients.

– *Jim Bryson, Chairman, 20|20 Research*

What Industry Leaders Say

The Insights Association is a proud partner of MRII’s education and certification legacy. A solid foundation of knowledge in all aspects of research, from business needs and impact to design, analytics, and ethics, is what differentiates and advantages people and companies. UGA and MRII provide current, on-demand, modularized, and certificate courses that help companies and individuals ground their work and enable growth.

– *Melanie Courtright, CEO, Insights Association*

ESOMAR is proud to be a long-time supporter of the Principles courses, and is honored to contribute to keeping these courses at the forefront of research. As the research industry continuously transforms itself with the adoption of new methods and data sources, a solid foundation in the principles that distinguish good research from bad research is more important than ever, for new entrants and veterans alike.

– *Finn Raben, Director General, ESOMAR*
